

LOWER TELECOM COST

Telecom services are the first place to look for immediate cost reduction opportunities for your business. We have already saved our clients over \$3 million this year through a proven audit process. This requires zero effort from you or your team. PSM will do all the heavy lifting.

Let our team pit the providers against each other and find you immediate savings.

20%+ of all telecom charges are **billed in error** (in the carrier's favor)

We find the errors and recoup your money or we provide you with competitive alternatives for future savings

PSM has contractual agreements with **over 100 carriers and service providers** and we act as a broker/agent

We average **over 30% cost savings** to our clients when we conduct a full audit of telecom expenses

Services audited: internet, wide area network, telephony and data center/colocation

Drive immediate cost out of your business
