PSM PARTNERS MICROSOFT SECURITY SOLUTIONS

We are a Microsoft Solution Partner with designations in Modern Work, Infrastructure Azure, and Security. Our mission is to become your most trusted partner for the long term. We pride ourselves on ensuring you get most of your investment with Microsoft while keeping your technology solutions aligned

1 GET STARTED

Threat Protection Engagement

Organizations today are managing a growing volume of data points and alerts while dealing with smaller budgets and the vulnerabilities associated with legacy systems. Get help achieving your broader security objectives—and identify current and real threats—by scheduling a Threat Protection Engagement.

- Three-day security expert-led effort. Delivered in your production environment using an E5 trial license.
- Deploy Microsoft Sentinel, Microsoft 365 Defender, Entra Identity Protection, and Microsoft Defender for Identity in the environment.
- Conduct Attack Simulation against the environment.
- Demonstrate the ability of Microsoft 365 E5 Security Suite to detect and respond to security threats simulated in the environment.
- Actionable recommendations from Microsoft experts about your security strategy, with key initiatives and tactical next steps

Cybersecurity Assessment

The Cybersecurity Assessment is designed to evaluate a customer's current cybersecurity posture and reduce their risk exposure by using advanced Microsoft Security products: Microsoft Defender Vulnerability Management, Secure Score, Microsoft Purview for Information Protection Content Explorer, and Insider Risk.

- The engagement is expected to require about a 1.5-day security expert-led effort.
- It is delivered in the customer's production environment and evaluates your current cybersecurity maturity level, discovering and addressing vulnerabilities on your endpoints and servers.
- Understand the risks related to data security and insider threats.

Deliverable: Provide recommendations and next steps: Map the engagement findings to common threat scenarios

2 GET SECURE

Customized scope of work based on the customer's roadmap or next steps from a cybersecurity assessment.

Microsoft Defender XDR
- Advanced XDR capabilities covering your entire Microsoft Stack
- Secure M365, Hybrid workloads, Endpoints, and User Identities
- Extends to 3rd party cloud systems and Apple/iOS/Android devices

Azure Sentinel SIEM
- Central logging and threat hunting paired with automated remediation
- Core to NIST SP 800-53 and CIS frameworks

Cost-effective security solutions
- Leverage technology you're likely already subscribed to.
- Multiple vendors can cause overlap and overbilling

3 STAY PROTECTED

Ongoing Management of all your security tools

- Highly certified security staff
- Continuous monitoring and adaptation to emerging threats
- Active threat hunting
- Incident response
- Automated issue remediation

Expert Security insights

- Regular reporting and threat analysis
- State of the Union security reports
- Industry-relevant security trends
- Security posture and recommendations reports
